Extended Abstracts

The Environmental Chemistry Division, in addition, requires extended abstracts (see extended abstract preparation and submission). These are due to Robert Lipnick, Organizing Committee Chair, by April 30, 2006. It is important that these abstracts not be sent to ACS.

Each extended abstract must be submitted electronically via email as an MS Word document including all text and graphics, to facilitate distribution and review by the Organizing Committee. The extended abstract should be at least 2 pages, but no more than 4-5 pages.

Instructions for preparing extended abstracts can be obtained from the ACS Environmental Chemistry Division website:

<http://www.envirofacs.org>

For papers submitted from the US, at least one of the authors needs to be an ACS member.

Further information will be available on the American Chemical Society web site at

www.chemistry.org

Select "Meetings," and then "National Meetings," from the "Quick Find" box.

Call for Papers

Persistent, Bioaccumulative, Toxic Chemicals Symposium

**National Meeting of the
American Chemical Society,
Environmental Chemistry
Division
September 10-14, 2006
San Francisco, CA USA**

The American Chemical Society's Division of Environmental Chemistry is sponsoring a symposium "Persistent, Bioaccumulative, Toxic Chemicals," as part of its fall, 2006 National Meeting in San Francisco, California.

The symposium topic was chosen in recognition of the increasing national and international interest within government, industry, and academia in identifying, prioritizing, and controlling the release of such chemicals into the environment.

Areas of Interest

- Brominated flame retardants, perfluorinated chemicals, and other emerging PBTs
- Legacy POPs, including methyl Hg
- Northern and Southern Hemispheres and Arctic and Antarctic
- Sources and levels in the environment
- Temporal trends
- Advances in trace analysis
- Environmental transport and fate
- Modeling and predictive methods
- Regulatory application of predictive models and tools
- Exposure of humans and wildlife
- Toxicity to experimental animals and wildlife
- Epidemiology - exposure and effects
- Risk assessment
- Risk management (pollution prevention, alternatives, treatment)
- Are there unidentified PBTs among chemicals in commerce?
- National and international voluntary and regulatory programs for reduction; issues of transboundary migration

Expression of Interest

Contact Robert Lipnick or one of the members of the Organizing Committee by email if you are interested in giving an oral or poster presentation at the Symposium.

April 15, 2006

Deadline for Abstracts

Abstracts of papers need to be submitted to the ACS OASYS online at

<http://oasys.acs.org/oasys.htm>

No later than April 15, 2006.
