

Undergraduate Student Award in Environmental Chemistry

The Division of Environmental Chemistry sponsors annual awards to full-time undergraduate students currently enrolled in an United States education institution in chemistry, environmental engineering or other programs emphasizing environmental chemistry. These students must have completed or completing one full year of study at their current institution by the date of announcement of the awards (May).

One award per department at an United States education institution will be given to outstanding full-time undergraduate students. The department will determine the criteria for the award and will make the selection. The attached form must be submitted to the Division of Environmental Chemistry Business Office by April 1 so that certificates and complimentary division membership may be processed and forwarded to the departments for presentation by May 1.

The award consists of a one year membership in the ACS Division of Environmental Chemistry (which includes the Preprints of Extended Abstracts for the two National meetings and the Division newsletter, *EnvirofACS*) and a certificate. Awardees will be publicized in the Preprints, *EnvirofACS*, the Division web site and *C&EN*.
